

## Quality Assurance Policy

**The University implements a quality system that is certified and capable of meeting the quality requirements of the higher education institutions, as well as the requirements of the quality management system standard to develop learning environments to keep pace with the modern technology, in order to provide the latest academic majors to support the scientific progress and meet the needs of the regional market through distinct competencies and leaders according to the following perspective:**

1. The University is serious and committed to being one of the best universities in the region by launching its graduates in all fields to be the leaders of the future.
2. To create an environment to stimulate learning, scientific research and community service compatible with the scientific developments, using the latest technology, to meet the theoretical and practical needs with the resources available to the University.
3. Continuous development of the educational process, academic curricula and study plans to achieve the requirements of the regional labor market in line with the scientific and technological developments.
4. Stimulating and developing the skills of outstanding and talented students by focusing on theoretical and applied scientific research in order to generate knowledge and utilize it to provide the region with entrepreneurs who believe in working to improve their country.
5. The senior management commitment and continuous support to the quality assurance system.

The university undertakes to implement its regulations and legislations, as well as the local regulations and legislations and to adopt the standard requirements of the international and local quality systems as a tool to achieve its principles, commitments and objectives.
