22. Middle East University's Choir evokes sentiments of patriotism and national pride at the Jerash Amphitheatre.

The President of Middle East University honours those who have achieved excellence in religious competitions and community programmes.

Amman: The President of Middle East University, Prof. Salam Al-Mahadin, in the presence of her Vice President, Prof. Ahmed Al-Louzi, and the Dean of the Faculty of Media, Dr. Hanan Al-Sheikh, honoured the winners of the Holy Quran Memorisation Competition, “Give Good to Receive,” and the Athar Initiative.

The university places a high priority on investing in its human resources, with a particular focus on academic development, personal growth, the provision of resources and opportunities, and the fostering of an inclusive environment that ensures positive change.

In the Holy Quran Memorisation Competition, Abdulrahman Shalabi, a student of the Faculty of Allied Medical Sciences, was the first-place winner in the male category, while Jinya Al-Sharqawi, a student of the Faculty of Engineering, was the first-place winner in the female category. The Bahja Initiative team was the first-place winner in the “Give Good to Receive Good” competition.

In her speech during the meeting, which was moderated by Dr. Muhammad Abu Halqa, a faculty member at the Faculty of Media, and attended by Dr. Jumana Al-Salem, Advisor of the Cultural Club, and Ms. Nadia Nasser Al-Din, Assistant Dean of Student Affairs, she stated that such periodic activities and programmes at the university provide an anchor that promotes discipline, instills moral values, and deepens their connection to their faith.

Dr. Mohammed Al-Arman, a member of the faculty at the Faculty of Arts and Educational Sciences, asserted that the students demonstrated remarkable proficiency, noting that such activities offer university students a substantial cognitive and moral benefit, thereby enhancing the overall quality of their university experience.

It is pertinent to note that the Holy Quran Memorisation Competition was organised by the Cultural Club at the Deanship of Student Affairs, while the Faculty of Information organised the “Give Good to Receive” competition.

The Summer Club at Middle East University provides an environment conducive to the development of students' talents from Amman and Madaba schools

Amman: Middle East University has provided students in the Amman and Madaba governorates with the opportunity to develop their talents and abilities in a number of significant fields. The programme encompasses four key areas: entrepreneurship, space science, cybersecurity, and digital content creation.

In this respect, Dr. Anis Al-Mansour, Director of the Consulting and Training Center, stated that the university's empowerment projects and programmes are derived from its educational policies, which focus on the necessity of providing an embracing environment and securing the requisite resources for the development of human capabilities through a robust and effective educational system that aims to provide students with quality skills and competencies.

The summer club is an initiative launched in collaboration with STEAM Village, one of the university's numerous partners engaged in the development and provision of technology-based resources and tools for students.

The summer club, which continues to run until August, aims to provide participants with a set of technical skills, ethical values, and best practices that will qualify them to build successful businesses, practice valuable trades, create harmonious families, and build a cohesive society.

The Sudanese Ambassador visits Middle East University and lauds the institution's excellent reputation within academic circles

Amman: The President of Middle East University, Prof. Salam Al-Mahadin, received the Ambassador of the Republic of Sudan in Amman, Mr. Hassan Saleh Swar Al-Dahab, in the presence of the university's legal advisor, Prof. Anis Al-Mansour, and the Dean of the Faculty of Media, Dr. Hanan Al-Sheikh.

In this context, Prof. Al-Mahadin stated that the university's strategy is to invest in the educational process and enhance its knowledge rigour.

Ambassador Swar Al-Dahab commended the university's esteemed reputation within academic circles, asserting that it is an optimal setting for the education that all individuals aspire to attain.

Ambassador Swar Al-Dahab attended the graduation project of Rawaa Abubakar, a student of the university's Faculty of Media, and praised the quality of his ideas and the way he presented them. As a matter of interest, the event was attended by faculty members and a group of students.

The podcast project, entitled "Window on Sudan," was supervised by Dr. Mohammed Abu Halaqa, a member of the faculty. It illuminated current events and recounted the experiences of individuals who endured the suffering in Sudan.

At an international conference, Middle East University presents its vision of artificial intelligence technology

Amman: At an international conference organised by the Union of Arab Universities, the Association of Chinese Universities, Ajloun National University, and the Arab Academy for Science, Technology, and Maritime Transport, Middle East University presented its vision on artificial intelligence technology to 50 Arab and international universities.

The university was represented by Mohammed Aliwat, a student of the Faculty of Information Technology who had participated in several training programmes provided by the Centre for Innovation and Entrepreneurship. These programmes included meetings and dialogue sessions on the latest research and innovations in the field of artificial intelligence, as well as discussions on the ethical considerations and responsibilities that accompany the development of artificial intelligence, including justice, transparency, and reducing biases in artificial intelligence systems.

The dialogue sessions illuminated the future of higher education, particularly in the context of the revolution of artificial intelligence and digital technologies. Furthermore, they illuminated the evolving role of educators in harnessing the full potential of these technologies in order to prepare students for the requirements of the new world.

It is worth mentioning that the university participated in an introductory exhibition that included dozens of educational institutions. Attendees expressed high praise for the university and its reputation for knowledge, research, and technology in the academic community.

Students of the Faculty of Engineering at Middle East University introduce ambitious ideas in their graduation projects.

Amman: The graduation projects of students from the Faculty of Engineering at Middle East University demonstrated a high level of ambition and innovation, reflecting their commitment to developing projects that challenge the status quo.

The engineering design of the projects demonstrated the students' competence in their respective fields of specialisation. Through careful design and rigorous testing, the students demonstrated their ability to deal with challenging engineering tasks, particularly in the case of a project that centred on the conversion of water into electrical energy.

"These projects represent not only a significant academic achievement but also an indication of the impactful contributions these students will make in their future professional roles," said Dr. Ayman Al Nsour, Dean of the Faculty of Engineering.

He further observed that the students' capacity to present complex technical information in a lucid and compelling manner is a testament to the esteemed education they have received throughout their academic journey.

Projects by the Faculty of Architecture and Design at Middle East University feature sustainable designs.

Amman: A significant proportion of the graduation projects of students at the Faculty of Architecture and Design at the Middle East University addressed green building practices and renewable energy sources, reflecting exceptional design capabilities.

The graduation projects provided students with an opportunity to engage in innovative thinking, enabling them to adopt new technologies and methodologies, which is of critical importance in meeting contemporary architectural challenges.

Each project is a reflection of the student's unique vision and style, allowing for personal expression. This enables students to convey their design philosophy and individual approach to solving architectural issues, as Dr. Ayman Awad, Dean of the Faculty, stated.

Furthermore, he added that the graduation projects demonstrated a profound comprehension of cultural and social contexts, underscoring the significance of such projects in enhancing the quality of life and fostering social cohesion.

A number of professors, employers, and specialists from Jordanian universities in the fields of architecture, interior design, and graphic design participated in the discussions held with the students.

The graduation projects of students in the Cosmetics and Chemicals programme offer innovative solutions

Amman: The graduation projects of the students enrolled in the Department of Cosmetics and Chemicals at the Faculty of Pharmacy at Middle East University presented innovative solutions to a range of skin and hair care issues.

These projects represent a significant aspect of the students' academic development. They demonstrated the students' advanced knowledge and qualitative skills acquired throughout their years of applied studies, from research and development to packaging, with the objective of ensuring maximum efficacy and providing the user with a safe and reliable experience.

The projects submitted by the students addressed the diverse and evolving needs of consumers, underscoring the students' commitment to advancing research and development in this rapidly evolving field.

Middle East University and the National Cybersecurity Centre sign a Memorandum of Understanding.

Amman: Middle East University has entered into a Memorandum of Understanding with the National Cyber Security Centre (NCSC) with the objective of promoting the advancement of the national cyber security system, addressing critical security challenges, and fostering a culture of technical awareness among all institutions and individuals.

The Memorandum of Understanding was signed by the President of the university, Prof. Salam Al-Mahadin, and the President of the centre, Engineer Bassam Al-Maharmeh.

This memorandum tends to facilitate a national dialogue between cybersecurity specialists, academics, researchers, and policymakers. The objective is to develop advanced cybersecurity defenses and strategies, thereby enhancing national security against cyber threats.

In this context, Prof. Al-Mahadin, in the presence of the Director of the Legal Department, Prof. Anis Al-Mansour, Dean of the Faculty of Information Technology, Dr. Odai Al-Maaytah, Head of the Cybersecurity Department, Prof. Shadi Nash, Dr. Ahmed Al-Najjar, a faculty member of the Faculty of Information Technology, and Director of the Information Technology Department, Engineer Raed Al-Lahham, elucidated that the university is receptive to all potential avenues that could foster fruitful collaborations, enhance the educational experience, and align with the demands of the labour market.

In response, Engineer Al-Maharmah, in the presence of Jihad Abdul Qader, Advisor to the President of the Centre, Naela Abandah, Director of Communication and Cooperation, Director of Legal Affairs Mutasem Marian, and Technical Operations Manager Tariq Amous, elucidated that the university has its own status, as it is one of the most effective institutions at the national level, and possesses knowledge and technical wealth that qualifies it to be a reliable academic beacon.

Middle East University facilitates workshops and disseminates research papers on military media and audience psychology.

Amman: The workshops held at the Military Media Institute by Middle East University on the criteria of military strategies, media dynamics, and audience psychology were well received by participants from the Jordanian Armed Forces and security agencies.

The workshops, presented by Dr. Saleem Sharif, Assistant to the President of the University, sought to examine the ways in which military institutions use media to influence public perception, manage information, and achieve strategic objectives. Additionally, they discussed the psychological tactics employed to influence target audiences, the ethical implications of using media and psychology in military operations and public opinion management, and the capacity of participants to critically analyse media content and identify psychological manipulation techniques.

In a similar vein, a discussion paper presented at the Counter-Narcotics Conference, entitled “The Role of Media in Counter-Narcotics”, delineated the role of the media in safeguarding the societal system and reinforcing national security against the scourge of drugs, while also outlining the accompanying challenges and ethical considerations that must be meticulously addressed. By providing support for ethical journalism, media literacy, and collaborative efforts, it is possible to enhance the effectiveness of the media in addressing drug-related issues and contribute to the development of a healthier and more enlightened society.

Dr. Al-Qudah has been promoted to Associate Professor at Middle East University.

Amman: The Deans' Council at Middle East University has decided to promote the Head of the Department of Private Law at the Faculty of Law, Dr. Yassin Ahmad Al-Qudah, to Associate Professor.

As a matter of fact, Dr. Al-Qudah currently serves as Vice Dean of the Faculty of Law and the Department of Private Law.

Significantly, Dr. Al-Qudah holds a PhD in private law, conferred by the University of International Islamic Sciences, and a Master's degree in the same field, conferred by Jadara University.

It is worth mentioning that Dr. Al-Qudah has a substantial body of published work, including numerous research papers and articles in peer-reviewed scientific journals. In addition, he is actively engaged in a range of social activities.

Pharmacists commend the experience of the Mini Diploma in Nutrition offered by the Middle East University.

Amman: Approximately one hundred pharmacists representing numerous medical institutions commended the experience of the Mini Nutrition Diploma, which was launched by the Consultancy, Training, and Language Centre at Middle East University in collaboration with Al-Iman Pharmaceutical Warehouse Company.

The month-long diploma programme focuses on a range of cognitive, functional, and diagnostic competencies related to patients. It is supervised by a number of specialists, employers, and academics who have adopted the most advanced teaching and practical models.

As a matter of fact, the introduction of the mini diploma represents a key initiative of the university, offering a valuable avenue for knowledge dissemination and human capital investment. Furthermore, it provides a dynamic environment conducive to fostering innovation.

The programme was inaugurated by Dr. Anis Al Mansour, Director of the Centre, who stated that the mini diploma encompassed a range of topics, including the fundamentals of nutrition, the impact of diet on disease prevention and management, and the practical applications of nutrition science in daily pharmacy practice. This would enable pharmacists to gain a deeper understanding of how nutrition affects public health and subsequently integrate this knowledge into their professional practices.

In a statement released by the company, Dr. Alaa Issa, the Marketing and Sales Manager, asserted that the diploma programme represents a fruitful collaboration with a distinguished academic institution that recognises the significance of promoting community health and well-being.

Middle East University organises a scientific visit to the National Paints Company.

Amman: A visit to the National Paints Company afforded students of the Cosmetics and Chemicals specialisation from the Faculty of Pharmacy at Middle East University the opportunity to gain insight into the practical aspects of industrial processes and production lines, including mixing, blending, quality control, packaging, and packaging.

The visit, which was attended by Dr. Suha Abu Dawla, Dr. Manar Arafa, and Dr. Nawzat Al Jabour, is one of many similar visits that provide students with the opportunity to gain hands-on experience, enabling them to bridge the gap between theoretical knowledge gained in the classroom and its practical application in the real world.

Dr. Amjad Abu Armileh, Dean of the College, stated that such visits afford students the opportunity to engage directly with cutting-edge technological resources and high-quality testing equipment.

Furthermore, he indicated that exposure to such technologies broadens students' perspectives on the capabilities and developments in the chemical manufacturing industry, inspiring them to explore innovative solutions in their work.

Middle East University offers a valuable workshop for students from the Faculty of Pharmacy on the MedDRA medical dictionary.

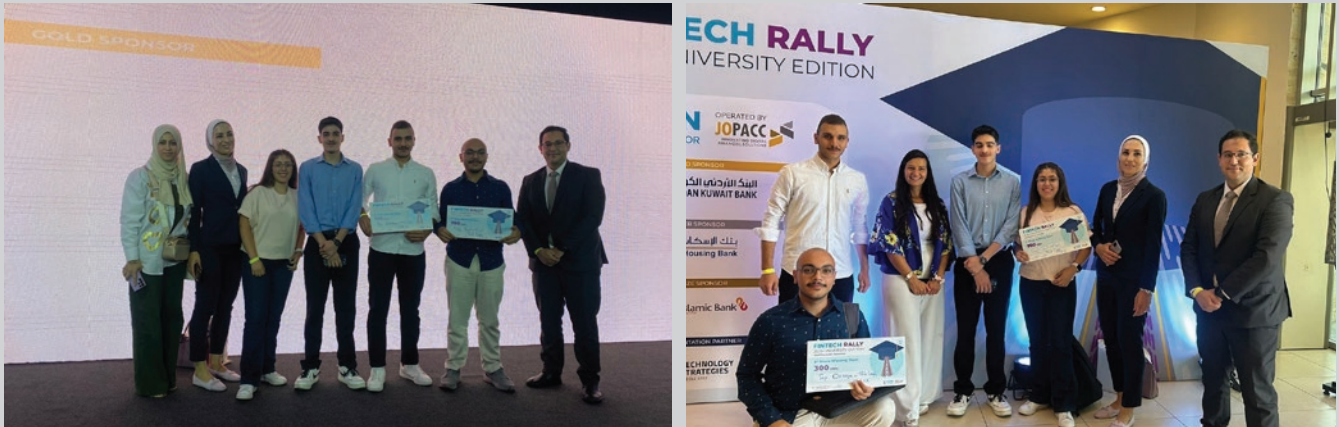

Amman: In a pioneering initiative, Middle East University (MEU) became the first Jordanian university to host a MedDRA preparatory workshop in collaboration with MedDRA. This provided an invaluable opportunity for its students to gain insight into a standardised international medical terminology dictionary.

The preparatory workshop is a valuable exercise due to the pivotal role of the dictionary in facilitating the communication and evaluation of data related to medical products for human use. This is particularly relevant for students of the Faculty of Pharmacy, who require a comprehensive understanding of the terminology and concepts relevant to their chosen career paths. Prof. Salam Al-Mahadin met with the MedDRA-certified trainer, Ms. Susan Al-Nsour, in the presence of the Dean of the Faculty of Pharmacy, Prof. Amjad Abu Armila, and the Head of the Department of Pharmacology and Clinical Pharmacy, Dr. Wijdan Al-Sharoukh, who was the supervisor of the workshop.

In this context, Prof. Abu Armileh emphasised the significance of the dictionary for students, noting that it is regarded as a unified language that enhances their professional qualifications and career prospects. This is particularly relevant in light of the approval of major regulatory authorities, including the US Food and Drug Administration (FDA), the European Medicines Agency (EMA), and the Japanese Pharmaceutical and Medical Devices Agency (PMDA).

Ms. Al-Nsour, a certified trainer, stated that familiarity with MedDRA is a prerequisite for students intending to pursue careers in regulatory affairs, given the in-depth requirements of the field and the necessity to possess a comprehensive understanding of medical terminology in regulatory and clinical settings.

Middle East University continues to reign supreme in the FINTECH RALLY competition.

Amman: The Middle East University team was awarded first and third place in the FINTECH RALLY 2024 UNIVERSITY EDITION competition, which was launched by the Financial Technology Centre (FTC) at the Jordan Payment and Clearing Systems Company (JOPAC).

The five students who participated in the event were Anas Al-Sayed, Talar Al-Kassous, Ghaith Al-Balbisi, Mohammad Raed, and Mohammad Batrani. They demonstrated remarkable proficiency in the competition, which involved the participation of approximately 120 students organized into 24 teams representing 10 Jordanian universities.

In this regard, the Dean of the Faculty of Business, Prof. Hisham Abu Sayma, stated that the advanced position of the students was not achieved without considerable effort. The university invests in its human capabilities by affording them academic and cognitive freedom and then integrating them into interactive training paths that situate them at the centre of an immersive experience that is highly sought-after.

The supervisors of the students, who are faculty members of the Faculty of Business and Information Technology, Dr. Jamila Mustafa and Dr. Doaa Mahyar, respectively, stated that the students' performance is an evident indication of their profound commitment to facilitate the desired technological transformation, which is a core objective of the university's curriculum, strategic plans, and collaborative initiatives with employers and industry professionals.

The competition represents the culmination of a series of freely accessible training programmes on the facilitation of fintech innovations and the provision of innovative solutions with a view to enhancing the services available on Qlik.

The participants of the 'Leaders before the Media and Spokespersons' course have expressed high levels of satisfaction with their experience at the Faculty of Media at Middle East University

Amman: An event presented by the Information and Community Police Directorate, in collaboration with the Anti-Narcotics Department, took place on the campus of Middle East University. It focused on the extended impact of drug use on the safety and security of the community system, as a society that is peaceful and pure provides a favourable environment for promoting physical and mental health.

The event was attended by the Vice President of the University, Prof. Ahmad Allouzi; the Assistant Dean of Student Affairs, Dr. Mahmoud Al-Duwairi; the Director of Information and Community Police Department, Colonel Mahmoud Al-Shiab; a representative of the Anti-Narcotics Department, Lieutenant Colonel Imad Al-Saqrat; and a group of officers and non-commissioned officers.

This was followed by a theatrical presentation by the Police Theatre Troupe of the Public Security Directorate, which addressed the role of drugs in deteriorating public health, increasing addiction rates, and exacerbating mental health disorders.

The performance demonstrated the catastrophic impact of drug use on public health, portraying it as a silent killer, a puppeteer behind the rising tide of addiction. With each scene, the layers of deception were revealed, exposing the deep wounds inflicted on individuals, families, and communities alike.

The theatre performance placed the audience in the position of the shattered dreams, which had caused life to deviate from its intended course, and presented drug addicts as a narrative of destructive pleasure and righteousness.

Middle East University conducts a workshop for the participants of MedDRA from within and beyond Jordan.

Amman: The workshop, which was conducted in a practical manner, provided participants, who were representatives of medical institutions and companies, with the requisite skills and knowledge to utilise the MedDRA Medical Dictionary in an efficient and effective manner, particularly in the context of clinical research and regulatory affairs.

The workshop, which was attended by 24 pharmacists and hosted by Middle East University, aimed to facilitate continuous learning and adaptive mechanisms for those aspiring to work in the pharmaceutical, healthcare, or regulatory sectors.

Those in attendance were given an insight into the structure and purpose of MedDRA, including its role in the coding of medical information and the facilitation of communication across regulatory bodies and industries. In an interconnected and dynamic world, the dictionary represents a unique opportunity.

Furthermore, the workshop was attended by representatives from the Royal Medical Services, Al-Hikma Pharmaceuticals, MS Pharma, the University of Jordan, and Zarqa Private University.

Middle East University organises a training workshop on the positive impact of physiotherapy on the body.

Amman: A training workshop organised by the Faculty of Allied Medical Sciences at Middle East University provided an invaluable insight into the pivotal role of physiotherapy in facilitating integrated physical and mental well-being.

The workshop provided an overview of the extensive benefits afforded by the physiotherapy pathway to the human body, including that the pathway facilitates pain management, improves functional mobility, and fosters health.

In addition, the workshop concentrated on methods of recuperation from injury or management of chronic illness, thus offering a route to enhanced health and quality of life.

Students from the Faculty of Media at Middle East University recognise the true values of transparency and integrity at the summer school.

Amman: The Al-Rasheed Summer School provided students of the Faculty of Media at the University with an invaluable experience that not only enhanced their academic and professional knowledge but also instilled a robust ethical foundation that will inform their professional conduct throughout their careers.

The experience, hosted by Transparency International, provided the students with the opportunity to engage with complex ethical issues and communicate with the wider community in preparation for addressing the challenges of the scene with integrity and transparency. This was in accordance with the objectives set out by Dr. Saddam Al-Mashaqbeh, supervisor of the students and faculty member at the Faculty of Media.

He further elucidated that the programme equipped the students with an understanding of ethical concepts and considerations, which in turn fostered a more profound comprehension of their responsibilities and developed their critical thinking abilities.

Our beloved country, Jordan, and the resilience of the Palestinian people in Gaza are central to the discourse on the Middle East at the Jerash Festival.

Amman: Middle East University's Choir is scheduled to perform at the 38th edition of the Jerash Festival for Culture and Arts, which is set to run until August 3.

The university's participation in the festival serves to exemplify the values of fraternity that are enshrined in all platforms of the Jordanian state, as well as the principles of humanity that have been compromised in the Gaza Strip. It thereby demonstrates that Jordan remains a robust defender of the nation's rights and an impenetrable fortress against oppression, injustice, and aggression.

In this regard, the President of the University, Prof. Salam Al-Mahadin, posited that Middle East University serves as a beacon of critical thinking and social activism. By participating in an artistic performance, the university seeks to raise awareness about the humanitarian crisis in Gaza. Its participation in the Jerash Festival is intended to highlight the aggression faced by the people of Gaza and raise the voices of those who are silenced, in order to ensure that the stories and struggles of the oppressed are not ignored or silenced.

The Dean of Student Affairs, Dr. Ayman Al-Khazaleh, asserted that the university's involvement in the festival is not an exercise in futility but rather a demonstration of support, particularly in light of its commitment to justice, advocacy for truth, and the reawakening of the senses.

Furthermore, he elucidated that art serves as an influential medium for evoking sentiments, conveying narratives, and fostering cohesion. He posited that the choir's performance will be anchored in the poignant themes of Jordan and Gaza, underscoring the universality of the human experience.

The Iraqi University President characterises “Middle East University”: It has been selected on the basis of its inspiring and serious nature.

Amman: In a meeting with the President of Middle East University, Prof. Ali Saleh Hussein, President of Iraqi University, commended the institution’s academic standards, its esteemed reputation, and its pivotal role in providing an exemplary educational experience.

He further commented, “Following an in-depth examination of the university, it became evident that it has made significant progress in attaining academic excellence and has established a commendable reputation within the research and academic communities. Consequently, we selected it as the optimal choice that aligns with our aspirations,” as revealed during the visit of an Iraqi delegation, which included the Cultural Counsellor in Jordan, Prof. Khairuddin Al-Amin, and other specialists.

In reception of the delegation, the members were welcomed by the Vice President of the University, Prof. Ahmed Al-Louzi; the Dean of Scientific Research and Postgraduate Studies, Prof. Ahmed Mousa; the Dean of the Faculty of Business, Prof. Hisham Abu Saima; and the Director of the Legal Department, Prof. Anis Al-Mansour.

Prof. Al-Mahadin stated that the university is dedicated to equipping its students and graduates with the cognitive abilities necessary for success in their chosen fields. To this end, the university offers a comprehensive range of academic and training programmes that facilitate integration into effective and influential technical and applied environments, particularly through the network of local and international partners with whom the university has formed strong relationships with employers and specialists.

She further highlighted that the university has a diverse range of collaborative and hosted programmes with esteemed British universities, including the Universities of Bedfordshire and Strathclyde. She emphasised that all faculties of the university have responded to the call for advancement in academic rigour and structural excellence, which would not have been achieved without their dedicated efforts. These efforts were inspired by His Majesty King Abdullah II and his vision for development and modernisation in science and knowledge. This vision has given the university a distinct advantage in obtaining numerous invaluable knowledge privileges.

Middle East University concludes the Summer Club: "We experienced a valuable opportunity for tomorrow," said the participants.

Amman: The participants from schools in the capital and Madaba expressed their experience of the summer club, which encouraged them to think critically, creatively, and ethically. Furthermore, it broadened their horizons by exposing them to various fields of study and practical applications. This was done in order to empower them to become forward-looking, innovative individuals, ready to face the challenges of the future. They considered this to be a valuable opportunity for the future.

The conclusion ceremony of the month-long summer club was attended by the Vice President of the Board of Directors, Dr. Ahmad Nasereddin; the Dean of the Faculty of Business, Prof. Dr. Hisham Abu Saima; the Director of the Consultancy, Training, and Language Centre, Prof. Anis Al Mansour; the Director of the STEAM Village, Engineer Banan Al Banna; and the students' families.

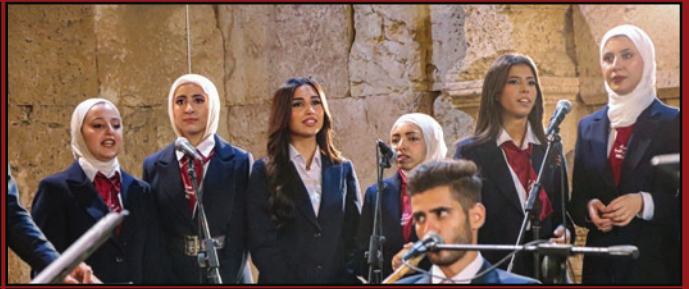

The summer programme concentrated on four key areas: entrepreneurship, space science, cybersecurity, and digital content creation.

Prof. Al-Mansour stated that the summer club offered its participants a hands-on method for developing business plans, fostering a comprehensive understanding of economic principles and innovation, as well as stimulating their interest in the universe and the future of space travel. Additionally, it encouraged them to contemplate the potential implications of space science for the future of humanity.

Furthermore, the cybersecurity track provided insight into pivotal matters pertaining to digital security, including information security threats and hacking. In addition, the digital content track offered a forum for creative expression, enabling students to convey their ideas and narratives through the construction of compelling narratives and the creation of engaging multimedia content.

Middle East University concludes the Summer Club:

"We experienced a valuable opportunity for tomorrow," said the participants

Amman: The Atrimus Amphitheatre in Jerash was the setting for a noteworthy performance by the Middle East University's Choir. The event represented a convergence of historical significance and vocal expression, evoking the past through the resonances of harmonious voices.

Those present in the amphitheatre included Dr. Salim Sharif, Assistant to the President of the University; Dr. Ayman Al-Khazaileh, Dean of Student Affairs; Nadia Nasereddin, Assistant Dean of Student Affairs; and representatives of the students' families.

The troupe, overseen by Mohammed Al-Sayed, Head of the Cultural Activity Division at the Deanship of Student Affairs, showcased sophisticated artistic techniques infused with messages of unity and resilience as a

manifestation of national identity and shared values between the Jordanian and Palestinian communities.

The incorporation of the artistic commentary of the 21-member troupe, which addressed the situation in Gaza and the challenges faced by the residents of the Gaza Strip under the threat of occupation and oppression, underscored the significance of cultural expression in influencing public discourse.

The involvement of the troupe demonstrated the capacity of universities to serve as hubs for cultural and social engagement, motivating students to leverage their abilities and perspectives to articulate contemporary issues.
